

Website Readiness Report

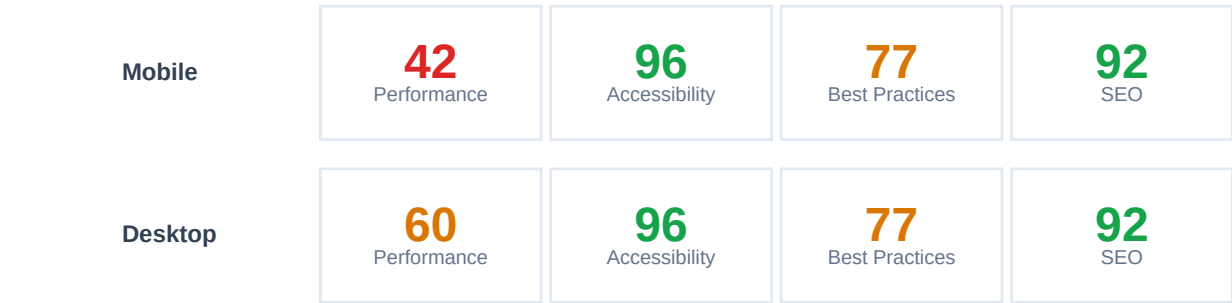

Target: <https://www.thetemeculalawfirm.com/>

17 issues detected across security headers, transport, privacy, accessibility, SEO and best practices. A higher score is better (100 = clean). SOC 2 readiness: 4 of 11 controls passing.

Google Lighthouse Scores

Real Lighthouse audit via Google PageSpeed Insights (rendered page). 90+ green, 50–89 needs work, under 50 poor.

Core Web Vitals (mobile): LCP 7.1s · CLS 0.010255 · TBT 774ms

Findings

HIGH Page title is missing

The homepage has no <title> tag, which Google uses as the headline in search results.

Fix: Add a unique, descriptive <title> of about 50–60 characters.

HIGH No clear way to get in touch

No contact form, email link, tap-to-call number, or contact page was found. Visitors who can't easily reach you usually leave.

Fix: Add a simple contact form, a visible email/phone link, or a clearly linked contact page above the fold.

MEDIUM CSP is missing

No Content-Security-Policy was sent in the response header or meta element.

Fix: Define a Content-Security-Policy that whitelists trusted sources.

MEDIUM**Cookie Secure flag is missing**

At least one cookie was set without the Secure flag.

Fix: Add the Secure flag so cookies are not sent over plaintext HTTP.

MEDIUM**Meta description is missing**

No meta description was found. Google often uses it as the snippet under your search result.

Fix: Add a compelling 140–160 character meta description with a call to action.

MEDIUM**No local business structured data**

No JSON-LD structured data was found. LocalBusiness schema helps you show up in Google Maps and local results with hours, address, and reviews.

Fix: Add LocalBusiness (or Organization) JSON-LD with your name, address, phone, and hours.

MEDIUM**No click-to-call link**

No tap-to-call (tel:) link was found. On mobile, a tappable phone number is one of the highest-converting elements a local business can have.

Fix: Make your phone number a tel: link so mobile visitors can call in one tap — and consider a 24/7 answering service so no call is missed.

LOW**Frame protection is missing**

Neither X-Frame-Options nor a CSP frame-ancestors directive was sent.

Fix: Send X-Frame-Options: DENY (or SAMEORIGIN) or set CSP frame-ancestors.

LOW**Referrer policy is missing**

Referrer-Policy was not present on the response.

Fix: Send Referrer-Policy: strict-origin-when-cross-origin or stricter.

LOW**Permissions policy is missing**

Permissions-Policy was not present on the response.

Fix: Send Permissions-Policy with an explicit allowlist for sensitive features.

LOW**Cookie HttpOnly flag is missing**

At least one cookie was set without the HttpOnly flag.

Fix: Add HttpOnly to cookies that do not need to be readable from JavaScript.

LOW**Cookie SameSite value is missing**

At least one cookie was set without a SameSite value.

Fix: Add SameSite=Lax (or Strict) so cookies are not sent on cross-site requests.

LOW**Primary heading was not detected**

No h1 heading was detected in the returned HTML.

Fix: Add a single descriptive <h1> heading near the top of the page.

LOW

Social sharing preview is incomplete

Open Graph tags (og:title/og:image) are missing, so links shared on Facebook, iMessage, and LinkedIn look plain or broken.

Fix: Add Open Graph and Twitter Card tags with a title, description, and preview image.

LOW

Canonical URL is missing

No canonical link tag was found, which can cause duplicate-content confusion for search engines.

Fix: Add <link rel="canonical"> pointing to the preferred URL of each page.

LOW

No online booking detected

No scheduling or booking link was found. Letting customers book themselves captures leads even after hours.

Fix: Add online scheduling (or an AI booking assistant) so visitors can book without calling during business hours.

LOW

Built on Wix

This site appears to run on Wix, a template builder. That's fine to start, but template sites are often slower, harder to optimize, and look like everyone else's.

Fix: A custom-built site loads faster, ranks better, and gives your brand a distinct, professional presence.

SOC 2 Readiness (4/11 passing)

Control	Check	Status
CC6.7	Encryption in transit (HTTPS)	PASS
CC6.6	HTTP Strict Transport Security	PASS
CC6.6	Content-Security-Policy	REVIEW
CC6.6	Click-jacking protection	REVIEW
CC6.7	Referrer leakage controls	REVIEW
CC6.1	Browser permissions policy	REVIEW
CC6.1	Cookie Secure flag	REVIEW
CC6.1	Cookie HttpOnly flag	REVIEW
CC6.1	Cookie SameSite directive	REVIEW
CC2.3	Accessible content (language)	PASS
CC2.3	Accessible form controls	PASS
